DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I in the reply filed on 28 September 2009 is acknowledged. The traversal is on the ground(s) that claim 6 is a product-by-process claim and that the process claimed in claim 1 is not an obvious process for making the product claimed in claim 6 and the process claimed in claim 1 cannot be used to make another product. This is not found persuasive because this application was filed under the provisions of 35 USC 371. Thus, normal US restriction practice does not apply. The unity of invention standard is applied in all US applications filed under 35 USC 371. As set forth in the restriction requirement, the product is the linking technical feature between the two groups, but the product was shown to not provide a contribution of the prior art, and thus cannot be considered a special technical feature.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to because the clarity of figures 4-6 is lacking due to being xerographic copies of the original figures. New copies of these figures should be submitted to ensure that these figures appear with clarity in any future publication. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be

canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-5 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the claimed method of making a silica-silver nanocomposite, in particular the formation by applying voltage to cause electrolytic formation.
5. The closest prior art is considered to be Kobayashi et al's *Deposition of Silver Nanoparticles on Silica Spheres by Pretreatment Steps in Electroless Plating*. Kobayashi et al teach the steps of providing a basic silica colloid aqueous solution, and depositing silver nanoparticles on the silica by an electroless plating technique. Thus, Kobayshi et al fail to teach the step of forming the nanocomposite by applying voltage to electrodes because electroless plating occurs with an electric current.

6. Kim et al's *Silver-nanoparticle dispersion from the consolidation of Ag-attached silica colloid* is made of record for sake of completeness, but cannot be applied against the present application because it is not prior art.

Conclusion

7. This application is in condition for allowance except for the following formal matters:

Presence of non-elected claims 6-15; and

Drawing corrections indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
